*Our **philosophy** is based
on a very simple principle:*

Let the crafts flourish!

GIVE A GIFT OF VALUE - TO YOURSELF AND OTHERS!

The best **materials**, **functional aesthetics** and **impeccable manufacturing** are for us a matter of course. Following our guiding principles, we have put together a gift catalogue with a selection of unique products to meet the most demanding requirements - first class **tool** for the home and garden, **handicrafts** and **knives**.

Know and give - our experience and **know-how** of more than a decade in the production and sale of outstanding tools, which is also reflected in more than 300 **craft courses** we offer. Feel **inspired!**

If you wish to make a gift of sustainable value, DICTUM has the present that suits you.

We love crafts!

People. Tools. Knowledge. We have been bringing them together in harmony for 170 years. DICTUM provides inspiring tools and materials for those who create lasting values with their own hands.

A nice feel and ergonomic shape, quality materials and good workmanship - there are many factors that combine to make first-class tools. Before we decide to recommend a product to our customers, it must meet a number of criteria: Our quality assurance standards are very high. Our unique tools - many of which we manufacture ourselves with great precision and attention to detail - stand our customers in excellent stead, day in, day out.

High-quality steels, blades with outstanding edge life and our individual sharpening service ensure that you can enjoy our superior products for many a year.

We practise traditional values and preserve ancient knowledge, but still we keep up with the times. Driven by a passion for crafts, our enthusiastic and accomplished team develops innovative products - often working closely with our customers - and redefines »craftsmanship« in keeping with modern times. Over many years we have created a portfolio of tools, materials and knives to meet the highest demands.

And they are waiting to be discovered by you - either in one of our shops or on our courses, where you can find out for your

self what it means to work with our products and assure yourself of their quality. We want your purchase to be a conscious decision. Our experts offer valuable tips and are happy to give you qualified advice for your individual needs.

Respect

DICTUM makes long-lasting products with absolute conviction. They are free of pollutants and harmful substances, and their origins are guaranteed and documented. We call this »fidelity of origin«. Japanese saws, for example, are made exactly where the name implies. We attach great importance to honest dealings with our customers, business partners and staff. Because DICTUM is about more than just tools.

A GENNO WITH DRAGON ENGRAVING

Dragons are considered the oldest and most powerful mythical creatures in Japan and are often revered as a talisman and the symbol of imperial power. The head of this hammer is the combination of the work of a Japanese master blacksmith and an experienced engraver. After the blacksmith has forged the blank in the fire and then selectively hardened it, the engraver engraves the matt finish, impact-absorbing middle part on one side with hammer and graver. In order to achieve a vivid effect, the Ryu (dragon) engraving is gone over several times until reaching its final depth. A handle made of Japanese red oak complements this exceptional hammer. Flat and curved faces. Each hammer head bears the signature of the master blacksmith and the engraver. Comes with red cotton pouch. Head weight 375 g
Overall length 360 mm
No. 714206 158.82 € **189.00 €**

- Very good directional stability**
- Rounded edges**
- Flat and curved faces**
- Selectively hardened**

AKIO AND MICHIO TASAI

The master smith Akio Tasai has earned himself a legendary reputation among Japan's metalworkers, especially due to his Mokume technique. His son Michio Tasai is following in the footsteps of his father, acquiring his Japanese sword-making license - the most prestigious accolade among smiths - at the tender age of 38 after eight years of study under the master sword smith Takano Yukimitsu. They use Blue Paper Steel, specifically manufactured according to their needs, to manufacture the cutting layer of their tools, as this particular steel remains easy to sharpen despite its hardness.

Exquisitely polished handle made of red oakwood

B TASAI OIRE NOMI, CHISELS, 6-PIECE SET *Price advantage*

Perfection is when there is nothing left to add or take away. Tasai used this philosophy to create a consummately complete, ready-to-use tool that satisfies even the highest standards. He is guided in this belief by principles that extend beyond mere design, such as the hand-forged steel ring, the beaten ferrule, or the exquisitely polished handle made of red oakwood. Even the »inner values« are carefully considered in the choice of Blue Paper Steel developed specifically for Tasai. Each back is polished by hand, and the bevel sharpened on waterstones ready-for-use, before the product finally leaves the workshop. Cutting layer hardened to 62-63 HRC.

6-piece set in a leather tool roll
 Blade width 6 / 9 / 12 / 18 / 24 / 30 mm
 Blade length 60 mm
 Overall length 220 mm
 Blade thickness 5-8 mm

Lifetime sharpening

DICTUM CHISELS / PARING CHISEL

DICTUM chisels feature blades and handles that are specifically shaped to create a perfect symbiosis between function and ergonomics, whether driven manually or using a mallet or hammer. The select steel quality (chrome-vanadium steel with high carbon content 59-60 HRC) makes them easy to sharpen and very durable at the same time.

B

B DICTUM® PARING CHISEL, WITH BIRCH BARK HANDLE IN LEATHER TOOL ROLL *Price advantage*
 What makes this paring chisel stand out is the new material bm1* made from birch bark. The manufacturing process involves bonding together individual slices of birch bark, which produces a unique natural texture, and applying them to a solid, impact-resistant hornbeam handle core. 6-piece set in leather tool roll.

Blade width 6 / 10 / 12 / 16 / 20 / 26 mm
 Blade length 95-105 mm
 Overall length 260-280 mm  
 Blade thickness 3-6 mm
No. 701648 234.45 € **279.00 €**

**Bm1 - birch bark not only has a pleasantly smooth, warm feel but also boasts unique technical qualities. The ultra-durable natural material is sustainable and ecologically produced, easy-care, water-repellent, and slip-proof even in perspiring hands. The material has an antiseptic effect, as it is antibacterial, antiviral and inhibits fungal growth.*

SPECIAL This set comes in the high-quality **Leather Tool Roll Deluxe** made of fine cowhide. The tools are safely secured in place by an elastic strap that prevents the tools from slipping out in any situation.

Precision-sharpened back

Bevel-edge chisels: reduces friction build-up during use, ideal for finishing

Our book
recommendation:

MOVING SAM MALOOF

Ann Kovara:
This book provides an insight into the not-always-easy life of internationally renowned furniture maker Sam Maloof and his wife Alfreda. For 45 years, they lived on a farm in Alta Loma, California, until the state decided to build a new motorway right where the Maloof farm was situated. The couple had no choice but to move. Between 1998 and 2001, they had to relocate from their historical residence with two barns used as workshops, a house and twenty trees to a new plot three miles away. Construction supervisor and architect Ann Kovara tells this story with many pictures that give insights into the world of Maloof's extraordinary furniture. 127 pages, hardcover, numerous photographs and drawings, 225 x 287 mm. In English.

No. 713086 37.29 € **39.90 €**

ROBUSUTA® FOLDING SAWS

When extended, these folding saws satisfy all functions and the stability of a traditional Japanese saw; their handles have a particular shape that lets them rest comfortably in the hand. They are folded away using the robust yet easy-to-use toggle lever. This protects the teeth from damage and ensures that the saw can be tucked away neatly even in compact storage spaces. The blade is replaced quickly and easily by loosening and tightening the positioning bolts.

ALSO AVAILABLE AS Dozuki Super Hard and Kataba Super Hard.

B ROBUSUTA® FOLDING SAW, DOZUKI UNIVERSAL®

This Dozuki saw with universal teeth is excellent for producing dovetail joints and all other kinds of wood joints. The ultra-thin and fine-toothed sawblade allows precise, tear-free cuts and the finest kerfs. The reinforced back stabilises the blade and reduces the risk of snapping. Ideal for all cuts across, along, and diagonally to the grain.

C JAPANESE TOOL BOX, EQUIPPED, 10-PIECE SET

This set contains basic equipment consisting of high-quality Japanese hand tools that are needed for all common types of woodworking. All tools are made of high-quality steel and Japanese red oak, and allow precise and stylish work. Fittingly, all tools are securely stowed in a tool case with a sliding cover. It is made of massive kiri wood, and is a real attention-grabber, not just because the marked corner fittings are real eye-catchers.

The tool box contains:

- Smoothing plane with plane blade made of double-layered steel, blade width 42 mm, blade thickness 5.8 mm, overall length 180 mm
- Octagonal hammer, mainly used for striking chisels and for assembly work, head weight 225 g
- Hybrid chisel, blade width 25 mm
- Hybrid chisel, blade width 12 mm
- Mitre square
- Punch awl, with square-cut tip, blade length 45 mm
- Akagashi saw for hardwood 210, blade length 210 mm, overall length 360 mm, blade thickness 0.6 mm, trapezoidal teeth 1.5 mm
- Replacement blade for Akagashi saw universal 270, blade length 270 mm, blade thickness 0.6 mm, trapezoidal teeth 1.9 mm

CHIYOZURU

Chiyo-zuru is one of the most well-known names for plane blades and other woodworking tools in Japan. Many of these forged tools from current and previous generations are viewed as national cultural treasures in Japan. Furthermore, the tools have also received numerous awards. After a 13-year apprenticeship under his master Chiyo-zuru Sadahide II (72 years old), the 37-year-old Chiyo-zuru Naohide (4th generation) was granted permission to manufacture and sell his own tools bearing the Chiyo-zuru name.

Intercalated silicon
in the soft iron are trueing the
waterstone while sharpening

A CHIYOZURU MARKING AND VENEER KNIFE

Chiyo-zuru Naohide chooses a slightly curved shape for his marking knife reminiscent of a Katana sword, and decorated it with a hole shaped like a Japanese gourd that has been sawn out by hand, which is traditionally regarded as a symbol for luck and success in Japan. This outstanding tool is made using Blue Paper Steel, its soft layer is made from wrought iron, which has now become rare (manufactured primarily before 1900). Due to the intercalated silicon it contains, soft iron trues the water stone during grinding and

opens its pores. This is indicated by the black dots in the iron. The hollow grind on the flat of the blade allows it to be drawn quickly and precisely during sharpening. The tool carries an engraving of the name Chiyo-zuru. Delivered in an elegant wooden casket.

recommendation:

HOLZ!
SCHNITZEN - TRADITIONELL UND URBAN

Max Bainbridge:

This book will inspire the reader to create stylish carvings they can be proud of. Max Bainbridge introduces the few key tools that are necessary for carving. It is best to start with a simple tablespoon or cooking spoon and slotted spatula, before moving on to a butter knife, chopping board or small bowl. Following the projects, the author explains the different techniques of surface design and provides tips on how to imitate and scorch fine woods and wax the new pieces. For beginners and experts alike!

A BOGENZIRKEL »L'ARC«

Since as far back as the Middle Ages, the compass has been resplendent on the emblem of the carpenters' guild alongside the right angle and the plane. Because the wing compass allows secure locking of the set measurement, it is considered an improved version of the older dividers. Our French model combines a simple design with functional materials. With legs of gunmetal-finished and therefore rust-protected steel, hinge and lever for adjustment of brass, hardened tips. In this day and age only a few tradespeople still know the value of a compass. It allows you to evenly divide distances like no other tool (often quicker than a pocket calculator), construct ovals

and ellipses, and determine aesthetic proportions based on the »golden ratio«.

DICTUM® MARKING GAUGE

Already in the 19th century, English tool manufacturers made a marking gauge with a round metal shaft to allow even more precise marking of mortises and material thickness. As well as its high marking accuracy, our marking gauge has an impressive rounded wooden insert for a warm, ergonomic grip. To keep the gauge true even on difficult grain, the marking head is designed as a disc blade. A deep-etched shaft scale for quick setup as well as the roll-stop face on the brass fence complete this high-grade marking tool.

Our book recommendation:

WOODWORKING IN ESTONIA

Ants Viires:

This book gives you a multitude of information about the entire history of woodworking in the small Northern European nation, Estonia. Stanley Tools kept the traditional aspect of this work by preserving its old look and design. The author, Ants Viires, combined personal interviews and direct observation of work habits with archaeological evidence and other literature of his country. It is a gigantic source of inspiration for anyone who is interested in woodworking. Find out, how our ancestors worked with wood - from prehistorical times up through Estonia independence. 304 pages, hardcover, more than 240 photographs and illustrations. In English.

No. 713056 27.10 € **29.00 €**

With a description of the different types of wood

B WOOD STOCK® FOLDING RULE

Every segment of this folding rule is made of a different type of wood. The front side has a scale and the rear side provides information on the distribution, characteristics and use of each type of wood. The folding rule not only provides correct measurements but also offers a playful introduction to the world of wood. All wood used is FSC-certified, the rule comes in an attractive black sliding box.

FELO - MADE IN GERMANY

Felo has been producing screwdrivers »Made in Germany« since 1950. Driven by innovative strength and quality awareness, the company has become one of the world's leading manufacturers of screwdrivers and bits. Felo is offering a 15 year warranty on all products.

B FELO TOOL SET CLASSIC XS, 18-PIECE SET

The best of two worlds:

This tool set with perfectly chosen equipment unites classical and modern styles. The heart of this set is a handy ratchet made of chrome-vanadium steel with an optional extension for sockets and bits. Bits fit directly to the ratchet head, providing a low operating height to make working in narrow spaces a breeze. The slightly angled handle protects against injuries. Every part of this set, including the high-quality bits and sockets, is clearly laid out in an exquisitely milled wooden case.

B

GLASS STONES BY SHAPTON®

The premium range from Japanese company Shapton is the glass stone series. The sharpening particles are highly pure and homogeneous. This is noticeable when changing to finer grits: The traces from the previous grit are quickly ground out. A special bond allows quick sharpening on a flat surface. The sharpening stone has a base of tempered glass and is thus 100 % warp-free. Conventional sharpening stones may warp microscopically by absorbing water, but Shapton stones solve this problem with their extremely flat base of tempered glass.

Another advantage of the glass base is that **the grit rating on the underside is always visible** even after much use. Before use, spray the stones with water. It is not recommended to keep them in water permanently. White aluminium oxide abrasive.

A SHAPTON® GLASS STONES SET »SEVEN« **Aesthetic - highly functional - in a class of its own:**

According to the credo »the beauty of the usefulness«, Shapton has again managed to combine the subject of sharpening and the fascination of sharp blades into a natural unit. Plus, the simple, almost artistic product becomes a design object that can be kept effortlessly clean thanks to the high-quality materials.

The set contains:

- 3 compact sharpening stones (160 x 37 x 12 mm) with grit sequence tailored to kitchen knives
- Anti-slip stone holder made of easy-to-clean glass
- Ultra-flat diamond trueing plate (accuracy of flatness ± 0.005 mm) for trueing the sharpening stones

Grit 500 (25 micron), 2000 (6.7 micron),
30 000 (0.44 micron)

No. 711624

251.26 € **299.00 €**

Workshop recommendation:

CLASSIC

Sharpening High-Class Knives

Content: You will learn and practice how to sharpen your knives on waterstones - precisely and in a manner that is gentle on the blades. The course also includes necessary background knowledge on steel and sharpness. Thanks to a combination of intensive practice and professional advice, your efforts will be rewarded with perfect results.

DMT® DIAMOND STONES

The US-based company Diamond Machining Technology, (DMT) is the leading manufacturer of high quality diamond sharpening stones. DMT tools are precision manufactured, highly wear resistant and extremely effective. The diamond-coated blocks remain permanently flat, and are especially suitable for tools with straight blades as well as for producing flat surfaces (e.g. backs of plane and chisel blades, plane soles, scrapers). We recommend moistening the DMT stones with water and grinding with little pressure.

The wooden box is made of cherry tree wood

B

B DMT® DIAMOND WHETSTONE™ SET *Price advantage*
 The wooden box provides a convenient and elegant way to store the three Whetstone™ sharpening blocks that are included with the set and to protect them from damage and dirt. Block sizes: 152 x 50 x 19 mm. Coarse, fine, extra-fine grit. The wooden box is made of cherry tree wood and has non-slip rubber feet.
 200 x 190 x 40 mm.

**MASTER
WORKSHOP!**

**A PRUNING SHEARS
WITH LEATHER WRAPPING**

Sturdy, forged shears (C58 steel) made for effortless cutting through branches and twigs. Smooth leather is rustically strung around the curved handles, contoured to fit the heel of the hand. The shears therefore lie comfortably in the hand. They are easy to clean after finishing work, as the cutting edges are polished so that dirt can hardly cling to them. The leather wrapping can be easily replaced, making these shears a companion for life.
Max. branch diameter 15-20 mm
Overall length 200 mm
280 g

No. 718133 71.09 € **84.60 €**

Finely adjusted

B GIFT SET PRUNING SHEARS AND LEATHER SHEATH 

The ultimate tool for keen gardeners - a very valuable gift set: a pair of extra strong tree and vine shears (No. 718115) with extremely sharp cutting edges, ideal for cutting fruit trees, rose bushes and vines. Finely polished blades with outstanding durability, ergonomically forged handles, pure high carbon steel with leather sheath (No. 718118) in a very attractive gift box. Max. branch diameter 15-20 mm Overall length 200 mm 250 g

No. 718186 83.19 € **99.00 €**

ARNO®

Ergonomic design and sophisticated function - the professional garden shears made by the traditional French company Arno have embodied these characteristics since 1927. French viticulturists and fruit growers swear by the shears, which save energy and protect plants when harvesting fruit and grapes and growing flowers.

C ARNO® FRENCH PRUNING SHEARS, OLIVEWOOD 

Strong shears primarily for pruning fruit trees. The olivewood handles rest comfortable in the hand. Drop-forged, selectively hardened carbon steel with hardened blade inserts. Hardness approx. 58 HRC. Leather sheath with belt loop. Max. branch diameter 15-20 mm Overall length 200 mm 295 g

No. 707480 75.55 € **89.90 €**

Bypass shears
Precise, clean cuts, ideal for cutting green wood.

Inclusive free Sharpening Pass.

 So that our pruning shears become your life-long companions, we offer a wide range of replacement parts and accessories available on request.

Our book recommendation:

OBSTBAUMSCHNITT GRUNDKURS

Uwe Jakubik:
 Only fruit trees that are cut properly and regularly guarantee a healthy and tasty harvest year after year. This book is designed for hobby gardeners who want clear and concise information about what is important when cutting fruit trees. From preparing the ground to protecting the plants, right through to the correct pruning techniques, this book will tell you all you need to know about cultivating your fruit trees and increasing their yield. 96 pages, hardcover, many colour photographs and illustrations, 170 x 235 mm. **In German.**

No. 713540 12.06 € **12.90 €**

B JAPANESE FOLDING SAW DELUXE 240

Handmade: The details make the difference to industrially-manufactured series products. For example, the blade of this saw is taper-ground 0.2 mm, and the teeth sides are polished to make cutting even easier. Clearing teeth prevent clogging. Manual straightening on the aligning anvil by the master saw-smith himself ensures that the saw blade runs smoothly. Curved Kashi body with rounded edges.

Blade length 240 mm
Blade width 35 mm
Blade thickness 0.6 mm
Overall length 525 mm
Setting 0.9 mm
Crosscut teeth 2 mm

No. 712107 58,74 € **69,90 €**
Repl. Blade **No. 712108** 29,92 € **35,60 €**

C SILKY® POCKETBOY 170, COARSE

Whether on the building site, in the workshop or for outdoor use, this compact folding saw with its razor-sharp teeth runs rings around many »large« saws. For crosscuts and rip cuts.

- Saw blade is hard-chromed and thus rustproof
- Robust aluminium handle with anti-slip rubber coating
- Can be locked in two positions - also for cuts in tight spaces

Taper-ground blade with no additionally set teeth:

- Allows cutting with little friction
- Creates the cleanest cuts - helps water run off quickly and thus prevents rotting

Special raker teeth:

- Reduce the cutting force on the other teeth and thus increase the edge life
- Prevent clogging

Blade length 170 mm
Blade width 30 mm
Blade thickness 0.9 mm
Overall length 370 mm
Crosscut teeth 3 mm

No. 712776 31.34 € **37.30 €**

YOSHIHIKO AKITOMO

Yoshihiko Akitomo is a third-generation master smith and successor to the family business that has existed for over a hundred years. Akitomo uses the »Koufuse Tsuki« smithing technique that is also used for making Japanese Samurai swords and is passed on from generation to generation. Only Japanese steels with a high carbon level (White or Blue Paper Steel) are used for manufacturing these machetes.

Curved blade
made of White
Paper Steel

Double bevel

Guard and handle
with high-quality Urushi
surface, protects
against dirt and water

B

B NATA »YAMA ARASHI«

Like a storm in the mountains (translation for »Yama Arashi«), this archaic-looking machete leaves nothing standing but bare trunks and shrubs. The slightly curved blade with a cutting edge of specially produced White Paper Steel has a high hardness and a long edge life. The ergonomic handle that tapers towards the end ensures a slip-proof grip thanks to the taping and the guard. For optimum long-term

protection against dirt and water, Master Akitomo provides the whole handle as well as the guard with a high-quality Urushi surface. Comes in an elaborately produced wooden sheath with leather belt loop.

Double bevel.
Blade length 240 mm
Overall length 410 mm

No. 710862 231.09 € **275.00 €**

With their laminated forged blades, Japanese axes are the epitome of the fine art of blacksmithing. The durability and sharpness of the steel along with the well proportioned axe heads and handles are unmatched!

Japanese axes feature:

- Forged multi-layered blades - very hard cutting edges of 58-60 HRC steel and impact-absorbing soft iron body
- Handle of untreated Japanese white oak
- Each axe comes with a handy sheath

A JAPANESE GARDENING HATCHET »EDAUCHI ONO«

High impact:

Hand-forged garden hatchet, ideal for cutting branches and roots and for sharpening and trimming posts. 3-layer blade structure with cutting edge of Blue Paper Steel. Untreated, ergonomically shaped Japanese white oak handle.

Magnolia wood sheath, allows axe to be attached to belts.

Head weight 600 g
 Blade length 160 mm
 Overall length 350 mm
No. 701657

109.16 € 129.90 €

Handle-fitting pass
 One handle fitted free.

DICTUM

Our high-quality axes with practical design are produced in small European forges according to traditional forging techniques.

Features of a DICTUM axe:

- Forged by hand of C-60 carbon steel (hardness 56-57 HRC*)
- Practical, tried and tested axe shapes
- Ash handle with a natural Urushi surface for comfortable feel and dirt protection (water-proof, solvent-resistant, extremely ageing-resistant)
- Handle is set by means of a wooden wedge and an additional metal wedge
- Each axe comes with premium leather sheath made of vegetable-tanned cowhide*
(* unless otherwise stated)

B DICTUM® FOREST HATCHET

This forest hatchet with typical German head shape, standard since 1935, has a long cutting edge with a slight slope. This ensures a high level of accuracy, making it ideal for limbing small trunks. The double-bent crowbar handle ensures fatigue-free working and can be used safely with one hand thanks to the knob on the end of the handle.

Head weight 810 g
Blade length 100 mm
Overall length 460 mm

**BONSAI - SCHNEIDEN, GESTALTEN,
PFLEGEN**

Peter Warren:

This compact guide includes everything you need to know about bonsai care - different styles, selecting a tree and pot, equipment, important techniques and regular tending activities. Includes a plant index with detailed colour portraits of the most popular trees and shrubs for bonsai cultivation. 223 pages, hardcover, over 650 colour photographs, 200 x 240 mm, **in German.**

No. 713030

18.64 € **19.95 €**

A BONSAI TOOLS, 5-PIECE SET

High-quality Japanese bonsai tools in traditional tool roll. This basic set includes the following tools for growing bonsai trees: pruning shears, leaf tweezers, concave and wire pliers, brush. 370 x 200 mm.

No. 707919

109.16 € **129.90 €**

B

B JAPANESE GARDENING TOOLS, 7-PIECE SET *Price advantage*

For professionals: Professional set of Japanese quality tools for pruning and planting. It includes the Kijo pruning shear (No. 718169) for cutting without damaging the plant, a Silky Pocketboy folding saw 170 (No. 712776), a universal planting, rooting and transplanting knife (No. 718157), a flower and allround shears (No. 718099), the sickle knife for harvesting and cutting weeds (No. 718158) and the Japanese garden knife (No. 709169), stylishly housed in the gardening apron made of split leather (No. 707501).

No. 718916 137.82 € **164.00 €**

The gardener's apron has space for everything!

ICHIHANA SPRAY LANCES

Handmade: for over 350 years the Japanese company Ichihana has manufactured spray lances made of high-quality muntz metal, a forgeable brass alloy. The hand-hammered brass quickly takes on the body temperature and has an antibacterial effect due to the high copper content. The holes are etched from both sides in a special process, which creates an hourglass shaped cross-section. This type of manufacturing permits an extremely fine and precise spray. With plug system for ½ inch hose couplings.

A ICHIHANA SPRAY LANCE WITH PRECISE SPRAY

The head can be opened via a stainless steel ring, making it easy to clean. Sieve insert and rubber seal are replaceable. High-quality ball valve included.

1 Spray Lance 375 mm

The short length and narrow spray allow precise watering of terrace plants or vegetables in raised beds.

Head diameter 45 mm
Overall length 375 mm

No. 746200 63.03 € 75.00 €

2 Spray Lance 640 mm

Long lance with narrow head for densely planted areas in the garden.

B

5 litres

B HAWS® SLIMCAN WATERING CAN, 5 L
 Due to its oval shape (held close to the body) and lower capacity, this model is ideal for longer distances and high-grown sensitive blossoms. The oval brass rose, which faces upwards and sits drip-tight on the soldered-in neck, sprays the water fine as rain and is therefore suitable even for watering seeds or blossoms. The practical C-shaped flanged

handle is extremely robust and can be held with both hands. And the patented curved shape ensures an even spray. Galvanised and with a powder paint coating, the watering cans are permanently resistant to rust.
 Overall length 650 mm
No. 718984 48.24 € **57.40 €**

Woolpower®

ÖSTERSUND

For hunters,
outdoor fans and
craftsmen!

WOOLPOWER®

Woolpower AB was established in 1969 in Östersund, Sweden, for the production of nylon tights. In the early 1970s, the company developed a new material in collaboration with the Swedish army: »Ullfrotté Original«. Beside military and police organizations, mainly people who work outside and many others who like to feel warm are among the customers for clothes made of this fibre.

- Wool does not retain odor and therefore the clothes do not smell unpleasant even after long periods of use
- Woolpower® articles are certified by Öko-Tex - an international human ecology label that shows that the garments contain no toxic or harmful substances
- Can be machine-washed at up to 60 °C (104 °F) and tumble-dried at medium heat
- Made in Sweden. Each garment is labelled with the name of the seamstress

 For other colours and designs of our Woolpower® collection see www.dictum.com/woolpower

BERTL SCHUHMANUFAKTUR

Bertl Shoemaker's Shop uses traditional shoemaking techniques to produce shoes of exceptional quality and durability. Bertl focuses on traditional production technologies and the use of high quality materials. You can feel the results directly on your feet, even after years of wear. Bertl will replace any individual component at any time, providing uncompromising quality at low costs. Bertl shoes are made from 100 % German materials and entirely manufactured in Munich.

100 % cotton shoelaces

Double-Stitched Style

Vegetable tanned insole, suitable for allergy sufferers

Waterproof Russian leather

C BERTL BOOTS CLASSIC

The workboot: Around 200 years ago, the double-stitched workboot was designed for mountain farmers and forest workers who had to work under the extreme conditions of the high mountains. It is the perfect workboot for at home, on the farm or in the workshop. The boots are made of 4 mm thick, greased Russian leather, which is almost fully waterproof. This thick material allows lacing without eyelets, giving the boots an elegant lightness.

- Profiled outsole with a high percentage of Indian rubber (similar to a climbing shoe) for strong grip
- 100 % cotton shoelaces

When trying the boot, your heel should be approx. 1-1.5 cm (finger width) from the rear of the boot, with your toes touching the very front.

- Manufactured on asymmetric shoe trees for a perfect fit
- Leather uppers allow fast removal of even deep scratches by simply napping the flesh side
- Stabilizing rear cap, stitched from the outside using traditional techniques
- Vegetable tanned insole for optimal comfort (suitable for allergy sufferers)

Double-Stitched Style

In shoe-making, the word »style« describes the join between the top and the bottom of the shoe. »Double-stitched« is the most robust style, traditionally used for climbing boots. In this technique, after finishing the first stitching, the upper shoe leather is curled up and sewn to the midsole. Turning the leather provides stronger protection against moisture. Double-stitching makes shoes particularly robust.

FILSON - SINCE 1897

Headquartered in Seattle, Washington, and renowned for making products in the USA from fabrics such as heavyweight Tin Cloth and warm Mackinaw Wool, Filson stands for the highest quality and most durable apparel and accessories available.

A

A FILSON ALL-SEASON RAINCOAT

Built with 11-oz. Shelter Cloth, this thick, waxed-cotton raincoat holds back moisture. Seam-free shoulders keep the rain out in a downpour, and Filson liners can be zipped in during the winter.

- 8 YKK two-way solid brass zipper closure custom cut at Filson with snap-closure storm flap
- 2 flap pockets, 1 interior zipper pocket
- Snap-adjustable cuff closure
- Drawcord-adjustable waist for custom fit
- Attached three-piece hood with visor is drawcord adjustable

Filson - product development

Starting in 1897, Clinton C. Filson listened to his customers. »We have obtained our ideas of what is best to wear... from the experience of the man from the North - not merely one - but hundreds of them.«- C.C. Filson, 1897. Nothing has changed since then. In fact, most new products are based on customer comments. And, just like C.C. Filson did, the company refines their designs based on customers' and field testers' experiences in the field.

Filson works to build comfort, protection, and durability into every product, plus practical features you will need for work or play outdoors.

- **Sharpening Primer**
No. 711085 46.13 € **54.90 €**

SAJI HOCHO

Distinctly rich in contrast, this eye-catching blade consists of 31 layers in total. The cutting edge made of SG-2 steel manufactured using powder metallurgy lends it an exceptional sharpness and durability. The desert ironwood handle scales, designed specifically with European hands in mind, are fitted to the one-piece blade. Sourced in the deserts of Arizona, the Olneya tree grows at an exceptionally slow pace to produce desert ironwood, one of the world's hardest and densest timbers. The exquisitely beautiful grain shows a golden brown hue with dark streaks. Its high density makes the wood particularly resistant to moisture. One mosaic pin and two stainless steel pins add the finishing touches to the look of this delightful knife. Polished stainless steel flanges bearing the master's engraved signature form the transition point to the blade. Stainless, double bevel, hardened to 63 HRC. Supplied in a box made of kiri wood.

Takeshi Saji is among the most famous master smiths in the Takefu Knife Village.

Blade with expressive Suminagashi pattern

Double bevel for right-and left-handed use

FROM MASTER'S HAND

Masanobu Okada is a Japanese Dento-Kogeishi - a master of traditional crafts. Working out of the Takefu Knife Village, he represents the third generation of his family to fashion superb kitchen knives. The master blacksmith performs all the important work only for very special works of art. This makes every piece unique, special and valuable. The blacksmith guarantees this with his name.

A

A OKADA HOCHO, TAKOBIKI

Fish knife with a slightly curved blade in the form of a Japanese Katana (sword). The Takobiki is ideal for cutting fish fillets when making sashimi and sushi, but also to portion octopus. The blade's individual Suminagashi pattern is produced by 20 layers of folded steel enclosing the central cutting layer made of White Paper Steel. This ultrapure carbon steel has extraordinarily fine grinding properties, allowing it to achieve outstanding sharpness. The sandalwood handle possesses a fascinating brown hue with dark lines, and is held in place beneath a black ferrule

made of wood laminate. Right-handers will find the knife extremely comfortable to hold thanks to the finger groove positioned on the right side of the handle. The blade bears the signature of the smith and is double-bevelled. Hardened to 60 HRC, not rustproof.

TAKEFU KNIFE VILLAGE

The Takefu Knife Village is a cooperative of blade-smithing specialists. It has upheld the tradition of metal-working for almost 700 years. A small group of extremely skilled master smiths forge limited series of superb knives in their smithies located in the tiny village in Fukui Province. They craft their products by hand to create one-of-a-kind Japanese kitchen knives made only of the best materials.

Blade

SET

B ANRYU HOCHO,
2-PIECE SET *Price advantage*

The master smith Katsushige Anryu is the progeny of a knife-making family fashioning high-quality kitchen knives in the fourth generation. The smith was awarded the title of »Dento-Kogeishi« - »master of traditional crafts« - in honour of his work. The blade consists of 33 layers in total that create a distinct and delightfully appealing structure. The cutting layer is made of rustproof VG-10 steel, and the outer layers are also rustproof to ensure easy care. The

octagonal, brown sandalwood handle lies below a ferrule of black wood laminate. The blade bears the smith's signature and is double-bevelled. Hardness 60 HRC.

Set contains:

- **Santoku, All-purpose Knife** (No. 719920)
Blade length 170 mm
Blade thickness 1.9 mm
Overall length 310 mm
130 g

CLAUDE DOZORME

The company was founded in 1902 by Blaise Dozorme in Thiers, the knife capital of France. This family-run company combines traditional craftsmanship that has been passed down through the years with modern manufacturing technology. Thus, the range includes both traditional folding knives as well as new interpretations of regional knives. Even cutlery and flatware for the table are offered.

 For further steak knives
see www.dictum.com

A LAGUIOLE STEAK AND TABLE KNIVES

These beautifully shaped knives are an eye-catcher on any laid-up table. Thanks to their slightly curved handle shapes, they are comfortable to hold. The handle spine is adorned with ornaments filed by hand and the Laguiole trademark - the bee. Grained handle scales made of juniper with stainless steel ferrule. Mirror-polished blade made of rustproof X50CrMoV15 steel*. Comes in a

locking case made of beech wood. Double bevel, rustproof, hardness 56 HRC.

* *Steel analysis:*

B

B CHOPPING BOARD OAK/CHERRY

Solid chopping board made of robust oak and cherry. Wood from oaks is highly robust and impresses with its long service life. Furthermore, the naturally high tannic acid content has an antibacterial effect. Framed in and with two inserts made of cherry, this board is not just a useful item, but also a visual highlight in the kitchen. Each article has a unique natural wood

structure, making it one-of-a-kind. Anti-slip rubber feet on the underside ensure a firm grip. Care: The board can be treated with food-grade oil whenever necessary. We recommend the use of linseed oil. Has two grips on the sides. Handmade in Germany. 530 x 365 x 35 mm

4.6 kg

No. 707852 175.63 € **209.00 €**

C

C CHOPPING BOARD MOSAIC

The colour contrast of the two types of wood and the individually glued end grain pieces with visible annual rings create a singular pattern and a marvelous look. Due to the vertically oriented fibres, end grain is more cut-resistant and longer-lived compared to chopping boards made of long grain wood. Each article has a unique natural wood structure, making it one-of-a-kind.

Anti-slip rubber feet on the underside ensure a firm grip. Care: The board can be treated with food-grade oil whenever necessary. We recommend the use of linseed oil. Two grips on the sides. Made by hand in Germany. Chopping board made of American walnut, framed with light maple. 410 x 290 x 30 mm 2.3 kg.

No. 707851 158,82 € **189,00 €**

A KNIFE BLOCK, OAK

Fine knives should not be stored in a cutlery box or on a magnetic holder because the resulting magnetisation makes sharpening more difficult. Instead, we recommend this knife block specially designed for Japanese Hochos, made in Germany according to our stringent quality criteria. It accommodates seven knives with blades up to 270 mm long and 9 mm wide, as well as a pair of scissors. The solid weight provides stability and the pitched arrangement allows fast access. The surface is sanded and treated with vegetable oil. It is also suitable for European kitchen knives. Oak wood with thermo beech* inserts.

No. 709751

70.59 € 84.00 €

Space for
7 knives and a
pair of scissors

* **Thermo beech:** High-temperature treated thermo wood is not only resistant against bacteria and fungal decay, it is particularly stable and durable.

B

Easy to set up

B HINOKI CUTTING BOARD

Hinoki, the attractively grained wood from the Japanese cypress, is especially wear-resistant and durable. As the wood is not too hard, it does not dull sensitive blades. The high proportion of resin has antibacterial and fungicidal properties. The board is framed by two walnut strips, which not only look good but also prevent it from warping. Quick to set up thanks to a rotatable walnut base. Made in Japan. 330 x 220 x 15 mm

510 g

No. 707994

41.93 € 49.90 €

This knife block offers space for up to 10 knives

C FLEXIBLE KNIFE BLOCK

Universal application:

On the one hand a knife block should be handy, on the other hand it has become an attractive kitchen object. This bamboo knife block meets both expectations. The insert can be removed for cleaning purposes and rearranged in any order according to the size and variety of your knives. The loose bottom can be released very quickly and can be used as a cutting board. The variable knife block offers space for a total of 10 knives with a maximum blade length of 280 mm.

290 x 135 x 225 mm

No. 718981

134,37 € 159,90 €

The insert can be removed and individually rearranged.

For more knife blocks and cutting boards see www.dictum.com

Comfortable
wooden handle

MICROPLANE®

From the workshop into the kitchen: Microplane originally manufactured **rasps for woodworking**. Eventually it was a Canadian housewife who paved the way for the manufacture of kitchen tools when she set about baking a cake. Frustrated with her old, blunt grater, she took her husband's **Microplane wood rasp** from his tool box and was amazed at the excellent grating result. A sophisticated manufacturing process, perfected throughout 40 years of first-hand experience, makes Microplane products so amazingly successful. An innovative **photo-etching process is applied to fashion the teeth**. **Unlike stamped teeth, etched contours do not have any burr, achieve long service life and are extremely sharp**. The appliances cut the food with surgical precision, allowing the ingredients to preserve their full aroma and taste, and avoiding the crushing produced by many standard graters.

Razor-sharp blades
for first-rate grating
results

A non-slip rubber
end ensures
stability

A MICROPLANE® MASTER KITCHEN RASP

The Master series from Microplane combines a sturdy stainless steel frame with an elegant handle made of walnut wood. Razor-sharp blades will revolutionise your food preparation: Effortlessly grate cheese, fruit, vegetables, spices etc. with perfect results. A non-slip rubber base ensures stability and a safe grip. To preserve and maintain the wood, we recommend food-safe linseed oil from Sweden. The grater is not suitable for the dishwasher. With a hanging loop and reusable protective cover for storage. Friction surface 135 x 57 mm Overall length 300 mm

1 Extra Coarse

Ideal for: carrot, cabbage, cheese, potato, zucchini, apple.

SKEPPSHULT - SWEDISH COMPANY WITH A LONG TRADITION

The products of the Swedish foundry Skeppshult have been made by hand with high diligence already since the year 1906. The factory attaches great importance to **sustainable and energy-efficient production**, which is why they use only wind power for their processes and local raw materials sourced within a radius of 150 km. Skeppshult's products are exclusively made of natural, carefully controlled materials and ingredients with **no additional chemicals**. The pans are seasoned with organic rapeseed oil and delivered ready for use. You only need to rinse the product quickly with warm water prior to first use. For daily cleaning of the pan, a dedicated brush and warm water without any detergent should be used. This helps to preserve the natural non-stick coating and achieve best frying results.

The manufacturer gives a warranty of 25 years on the cast iron.

25-year
service
warranty!

*Ideal for meat
and fish*

A SKEPPSHULT FISH AND FILET PAN

The oval form of this pan makes it ideal for frying whole fish. Stainless steel handle, also suitable for use in the baking oven and on open fires.

Diameter pan bottom: 290 x 180 mm,
upper diameter 330 x 215 mm.

CAST IRON TEAPOTS

Enjoy the simple beauty of Zen-Buddhist tea culture with these teapots by Japanese craftsmen. Precision-cast from molten iron in a sand mould, the outsides are black-annealed to protect against oxidation, while the insides are enamelled. Includes stainless steel strainer insert. Note: Unlike Chinese copies and similar mass-produced items, the teapots offered here are guaranteed hand-made by Japanese master craftsmen, with the corresponding high standard of quality and workmanship. The glazes are guaranteed heavy-metal-free.

URUSHI

Urushi has been extracted from the Asian tea tree (*Rhus vernicifera*) for over 6000 years. It is **waterproof, food-safe, resistant to alcohol and solvents, does not become brittle or crack with age** and develops a beautiful patina with use.

Each bowl
is ONE of a
KIND!

A URUSHI SET OF BOWL AND SPOON

Spoon and bowl in attractive matching colours. The red-black colouring is obtained by coating the red-pigment Urushi layer with black varnish, which is then slightly sanded off again in some areas. The resulting random pattern makes each object unique. The grip of the spoon's handle is decorated with a special structuring technique which creates a non-slip, scale-like surface. This is achieved by applying fabric to the raw material and then colouring it with the technique described before.

Bowl Ø 115 x 70 mm, spoon 155 x 40 mm.

No. 831539

33.45 € 39.80 €

Extracting Urushi

Grooves are cut into the lacquer tree every four to five days in order to extract Urushi resin. In this way, approx. 20 ml of resin is harvested each day. The milky secretion from the bark is collected in a receptacle and then processed to produce the finished Urushi lacquer.

The grain of the wood remains visible beneath the Urushi coating

Also suitable for hot drinks, cereals & salads

black

vermilion

B SET OF URUSHI BOWLS »SENSAI SABI«

This bowl set is traditionally used as a set of tea bowls by Japanese couples.

Both bowls are first coated using the Suri Urushi technique so that the wood grain remains visible on the inside of the bowl and in those spots of the outside that are not colour-treated later. Then the outside is primed in the Roiro technique with one

of the basic colours (vermilion or black) and later the final coat is added in the respective other colour. After polishing, the final coat is removed, bringing out the layer underneath and resulting in a surface that is very rich in contrast.

CHERRY BARK TEA BOX

Kabazaiku, the traditional art of bark crafting, is especially common in the area around Akita, where the wild cherry tree forms a particularly hard skin in the harsh mountain climate. **For more than 200 years**, artistic craftsmen have been creating fascinating objects from cherry bark. To allow the bark to be shaped, it is first cleaned and made supple with steam, then the pre-shaped pieces of bark are attached to the wooden object with glue using a heated trowel. Cherry bark naturally keeps the air moisture relatively stable and is thus an ideal material for tea boxes. A precisely closing inside lid preserves the aroma of the tea. The tea boxes are at the same time useful containers and works of art.

A fine progression of colours from light to dark wood

A

A TEA BOX DELUXE, CHERRY BARK

The tea box made from high-contrast wood types is a both functional and aesthetically pleasing design object. It is made of cherry bark, American walnut, cherry wood and maple. The top layer of the laminated cover is made of fine veneer. Inside container of polished cherry bark.

Wood types from top to bottom: Cherry bark, American walnut, cherry wood and maple.

C FOLDING KNIFE HIGO-STYLE CARBON

A combination of a classic Japanese blade and a European handle. The attractive pattern of the Suminagashi blade with a total of 31 layers stands out clearly. It is opened using the lever tang and is securely locked in place with the smooth liner lock mechanism. For the handle scales made of carbon, thousands of microscopic carbon fibres were woven together and fused with epoxy glue. The result is an extremely durable material which, despite its low density, possesses considerable tensile and compressive strength. The handle back has an open design with a belt clip. Medial cutting layer made of rustproof AUS-8 steel, double-bevelled, hardness 58 HRC.

Durable handle scales made of carbon

HIGONOKAMI - JAPANESE POCKET KNIVES

Until two decades ago, nearly every young man in Japan owned a Higonokami pocket knife. It has been manufactured in the traditional manner for over a century. The blade is set in a handle without locking mechanism and is opened using the lever tang.

A HIGONOKAMI HYORIN

The original by Nagao:

In order to obtain the exceptional patina on the handle surface, the folded brass handle is corroded using a special process. The cutting edge layer made of Blue Paper Steel is flanked by two tougher layers of steel. The black forged skin on the upper part of the blade carries the signature of the knife maker Nagao, partly inlaid in gold. Double-bevelled, not rustproof, hardness 63 HRC.

TECNOCUT

Like most great Italian knife manufacturers, the company Tecnocut is based in the knife making capital Maniago. It has been constantly developing and producing new knife models under the brand name Viper since it was founded in 1987.

A VIPER® FOLDING KNIFE QUALITY

This classic gentlemen's pocket knife was designed by Fabrizio Silvestrelli, a member of the Italian knife makers' guild. The hammered titanium jaws perfectly match the handle scales. The handle back is set with four small finger grips. The handle form makes the knife easy to handle. The knife also does not have any edges, as all the components have been rounded. Comes with leather pouch. The polished blade made of rustproof Böhler-N690 steel is securely locked in place with the back lock mechanism, hardness 57-59 HRC.

ATELIER PERCEVAL

The company Atelier Perceval, which is based in the French knife capital Le Thiers, was founded in 1995. The factory's trademark is the select and often very extraordinary choice of materials used for the handle with high-quality finish for which the manufacturer offers a lifelong warranty. The knives are precisely made by hand and with no frills, lending them a timeless elegant look. The finely polished handle scales are mounted to stainless steel plates and fixed with three screws.

A LE FRANCAIS DAMASK

Inspired by a knife from the 17th century, Perceval developed the model »Le Français«. Due to its splendid twisted Damascus structure, the blade which is made through a powder-metallurgical process by Damasteel creates a beautiful look. A smooth liner-lock mechanism makes sure the blade is securely locked. The handle back has an open design and thus accentuates the puristic style. Hardness 57 HRC, rustproof. Comes with a pouch made of ecologically tanned cowhide.

1 Le Francais Folding Knife Damask, Juniper

Handle scales made of juniper. This kind of wood has a brownish colour and a very pleasant peppery scent. In the Middle Ages, this type of wood was popular for smoking purposes, as the smoke was considered to have a cleansing and disinfectant effect.

2 Le Francais Folding Knife Damask, Desert Ironwood

Handle scales made of desert ironwood. Due to its slow growth, desert ironwood from the Arizona desert is one of the hardest and densest wood types. It has a beautiful gold-brown colour with dark streaks. Due to its high density it is extremely resistant to moisture.

Blade length 90 mm
Blade thickness 2.2 mm
Overall length 200 mm
65 g

No. 709811

411.76 € 490.00 €

B LE FRANCAIS

Inspired by a knife from the 17th century, Perceval developed the model »Le Français«. The blade forged of Sandvik 19C27* steel has been hardened in liquid nitrogen (cryogenic treatment), which makes it extremely durable and easy to sharpen. A smooth liner-lock mechanism makes sure the blade is securely locked. The handle back has an open design and thus accentuates the puristic style. Comes with a pouch made of ecologically tanned cowhide. Hardness 57 HRC, rustproof.

* C = 0.95 / Si = 0.4 / Mn = 0.65 / Cr = 13.5 (in %)

Pouch made from ecologically tanned cowhide

1 Le Français Folding Knife, Juniper

Handle scales made of juniper. This kind of wood has a brownish colour and a very pleasant peppery scent. In the Middle Ages, this type of wood was popular for smoking purposes, as the smoke was considered to have a cleansing and disinfectant effect.

Blade length 90 mm
Blade thickness 2.3 mm
Overall length 200 mm

CLAUDE DOZORME

The company was founded in 1902 by Blaise Dozorme in Thiers, the knife capital of France. This family-run company combines traditional craftsmanship that has been passed down through the years with modern manufacturing technology. Thus, the range includes both traditional folding knives as well as new interpretations of regional knives. Even cutlery and flatware for the table are offered.

Blade with a splendid structure

Each knife is one of a kind

A FOLDING KNIFE LE THIERS® RLT

Unique handle materials make each knife in the Le Thiers RLT series unique. With its magnificent structure the rustproof Balbach Damascus DSC STAINLESS blade creates an excellent appearance. The blade transition can be adjusted using a small wrench; the blade runs on a ball bearing. A special feature is the extra wide plates on which the handle scales are mounted and fixed with three screws. The lavish ornamentation on the blade spring as well as the plates is hand filed. Comes in a wooden box made of oak with a leather pouch. Hardness 62 HRC, rustproof.

Blade length 95 mm
Blade thickness 2.6 mm
Overall length 210 mm

OUTDOOR KNIVES SAJI

The Japanese master smith Takeshi Saji uses traditional components to fashion utility knives that have revolutionised the market - not only in Japan. Blades of multi-layered steel make these knives feast for the eyes, while the steel used for the cutting edges lends exceptional sharpness and durability. The size of the handles is designed with European hands in mind, while a firm attachment of the tang and anti-slip features ensure that these knives are also ideal for heavy use. Saji's knives are characterised by highly functional design and a rustic finish alongside exceptional value for money. The master engraves his signature by hand on each of the blades.

MÜHLE

Pure shaving culture made in the Ore Mountains. High-quality shavers, fine brushes and elegant wet shaving accessories have been produced in a small town called Stützengrün, located in the Ore Mountains since 1945. Mühle combines traditional craftsmanship with trend-setting designs. The results are beautiful and durable products.

A MÜHLE SHAVING SET VIVO, 4-PIECE SET

Shaving set and chrome-plated stand in a perfectly matched look. The handles of high-grade black resin* are set off by their contrast with the classy chrome setting. Chrome is corrosion-resistant, particularly durable, and has an elegant, alluring shine.

- Many view the traditional 3-piece double-edged razor with a replaceable blade as the first ever mechanical »shaving device« for shaving oneself. This model possesses a closed comb and is designed to give a gentle shave, which makes it easy even for people unfamiliar with double-edged razors to use. Includes a razor blade.
- The shaving brush is made out of selected fine badger hairs. It creates a comfortable massaging effect and produces a creamy foam.

3-piece razor
with replaceable blade

Selected badger hair

- Metal soap dish, chrome-plated. Ideal for use with our shaving soaps from Thiers-Issard and Mühle.

94.12 € 112.00 €

* **High-grade resin** made of pigmented polyester. The individual handle pieces are turned out of solid rods and polished in several passes to additionally seal the surface and give the elements their special gleam. Handles made of this material are extremely durable and have an excellent feel.

BIRCH BARK HANDLES

Made from numerous individual layers of birch bark, a vivid material whose colour, growth pattern and texture vary greatly. A patented manufacturing process tailored to the material characteristics of birch bark allows high stability at a low weight. Compared to other natural materials, birch bark keeps its shape extremely well, especially when exposed to moisture.

B

Silver-tipped badger hair
very smooth and flexible

Handle birch bark,
anti-bacterial and durable

C

C MÜHLE SAFETY RAZOR ROCCA

The traditional 3-piece safety razor with exchangeable blade is considered by many people to be the first mechanical »shaver« for self-shaving. This model has an enclosed foam, adapts smoothly to the contours of the face and is therefore easy to use, even for inexperienced shavers. The surface of the razor head is satin-finished. The birch bark handle is naturally anti-fungal and anti-bacterial, water-repellent, highly moisture-resistant and slip-proof even when wet. Overall length 105 mm

75 g
No. 709694

83.19 € **99.00 €**

B MÜHLE SHAVING BRUSH ROCCA

For the shaving brush that is made by hand, only the best, carefully selected badger hair is used. Among connoisseurs, the silver-tipped badger hair is considered to be the crowning glory. The valuable natural material is particularly smooth and flexible. Thanks to the conical end of the shaft of the individual hairs, the brush is able to take up large quantities of shaving cream and direct it towards the tips. A further quality feature is the so-called

»mirror« - a black band that runs through the mostly silver shimmering hair. The brush head is equipped with a fine screw thread and therefore easy to replace. The birch bark handle is naturally anti-fungal and anti-bacterial, water-repellent, highly moisture-resistant and has excellent grip, even when wet. Ring diameter 21 mm. Overall length 105 mm

130 g
No. 709693

100.00 € **119.00 €**

RASOIR SABRE

The blades are made of non-rustproof carbon steel because it can be ground particularly fine and is impressively sharp. The supposed drawback of rusting can be compensated for by complying with the care instructions. Up to 80 individual work steps are required to produce the handmade blades. Finally, the blade is honed on Belgian sharpening stones and leather strops. Comes with handmade case of vegetable-tanned cowhide.

A RAZOR, BUFFALO HORN

Dark buffalo horn handle scales. Blade polished to a satin finish with round head made of French carbon steel 100c6 (C 1 %), fully hollow. With decorative grooves on the back of the blade.

Hardness 59-60 HRC.

Blade length 75 mm

Overall length 255 mm

60 g

Blade width

6/8" **No. 709720** 175.63 € **209.00 €**

RAZOR BY THIERS-ISSARD

Since 1884, the traditional French company Thiers-Issard in Auvergne has been making exquisite razors for wet shaving. The blades are made almost exclusively from Carbonsong C135 steel* with an extremely high carbon content of 1.35 %. Due to this high carbon content and the extreme hardness of approx. 64 HRC, they can be ground to a very thin edge, thus providing the necessary sharpness for a comfortable shave. For a better grip, the underside of the tang is serrated on all razors. Leather pouch included.

** Carbon steel is far superior to rustproof steel as far as sharpness is concerned. The supposed disadvantage of rust susceptibility is offset by following the care instructions.*

Common blade width
for beard shaving, ideal
for chin and cheeks

Blade with
full hollow, polished to
a satin finish

B »LE DANDY« RAZOR

Handle scales made of high-grade plastic, blade engraved with »Le Dandy«. Blade with round head and full hollow, polished to a satin finish.

Blade length 70 mm

Overall length 245 mm

JAPANESE SCISSORS (NIGIRI)

Japanese Nigiri are scissors in their most archetypal form. Forged from a single piece of carbon steel, they are exceptionally light and comfortable to hold. Pressure from the thumb and forefinger produces well-controlled cuts; the spring action of the thinly forged handle causes the blades to reopen automatically. Nigiri are suitable for all precise work with paper and fabric, opening seams, and trimming houseplants. All Nigiri come in elegant gift boxes.

Blacksmith's
engraved signature

Cutting layer made
of Blue Paper Steel

A NIGIRI BASAMI

Exclusive Nigiri for daily use: This pair of elegant Nigiri scissors is hand-forged from one single piece of double-layered steel. The epoxy-resin coating is applied in a special procedure and then fused, until it becomes hard. This makes the scissors a timeless design tool for everyday use. Comes with a kiri wood case.

Cutting layer made of Blue Paper Steel.

Hardness 60 HRC, not rustproof.

CAMPI-SCISSORS

New edition of the famous Campi scissors from the 1950s. Due to its timeless and elegant design, the scissors have received many awards and have been on display at the Museum of Modern Art (New York) among others. The forged scissors are made of stainless 3Cr13 steel*, sharpened by hand and are given a high-gloss polish. A smooth shearing action ensures precise cutting. The round eye rings are ergonomically shaped and comfortable to hold even after extended cutting.

*C = 0.35 / Mn = 1 / Cr = 13 % / Ni = 0.6 (in %)

PUZZLE BOXES

Himitsu Bako boxes are certainly among the most intriguing hand-crafted wooden objects made in Japan. At first glance, they appear to be nothing more than simple boxes with intricately inlaid surfaces. Try to open them and you will quickly discover that their intricacy is more than just cosmetic. The panels must be manipulated in a pre-set series of steps to release the locking mechanisms hidden by the mosaic and allow the lid to slide open. The production of these highly precise mechanisms is a challenge which requires decades of experience - the youngest master Himitsu makers are over 60 years old.

A PUZZLE BOX ZEBRAWOOD, DOGWOOD
Zebra wood is one of the most fascinating precious woods and gives this puzzle box a lively vibrancy. Manufacturing such intricate puzzle boxes with their precise guides and joints requires a lot of experience and expertise. Made in Japan. Solution provided. Internal dimensions 40 x 28 x 26 mm. 65 x 45 x 50 mm
No. 820253 22.61 € **26.90 €**

B PUZZLE BOX DOGWOOD, PURPLEHEART
Pure Japanese design - complex inner life:
A simple rectangular box at first glance, it turns out to be a puzzle box with different push and swivel mechanisms. The selected, finely grained dogwood components are fitted by hand. Only master craftsmen can manufacture such precise joints and guides. Small purpleheart cubes complete the illusion. Made in Japan. Solution provided. Internal dimensions 45 x 28 x 19 mm. 65 x 45 x 55 mm
No. 820252 22.61 € **26.90 €**

91.60 € **109.00 €**

THE ART OF LEATHERWORK: »INDEN-YA«

A Japanese family-run business has been devoted to the manufacture of leather products ornamented with Urushi lacquer since the 16th century. Back then, they mainly produced protective leather garments for Samurai warriors and helmets. Today they make leather products for everyday use. The softest deer leather is smoke-stained and dyed using a traditional Indian technique. The decorative pattern is then silkscreened onto it by hand, using traditional Urushi lacquer made from natural tree resin. The surface has a tangible texture which is completely water-resistant and has a pleasant leathery smell.

White deerskin

is pickled in smoke. The leather is then dyed to suit the base colours of the product (black, indigo, burgundy).

The Urushi lacquer,

made from tree resin, is applied to the leather by hand to produce different patterns. Silkscreen printing is used here.

A INDEN-YA ZIP-UP PURSE

Practical purse which can be used to hold money as well as jewellery, make-up or any other small but important items for everyday use. With small outside compartment.

HORN BOWL

For centuries, hornware has proven itself in daily use. This natural material does not only offer a distinctive appearance but also a variety of positive features. Genuine horn products are safe to use, food safe, free from toxins and tasteless as well as acid-proof and color-fast. These features make horn products the ideal kitchen tool and accessory. Like every other natural material, horn is not homogeneous in colour and shape. Therefore each single horn product is unique due to its finish and material!

A DECORATIVE FRUIT BOWL, HORN
A bowl versatile and impressive as nature itself. The organic form is attained by a special handcraft technique. The different shades of color of the horn lend the bowl a unique haptic impression and natural elegance.

SHOPS**

KNOWLEDGE GROWS THROUGH COMMUNICATION.

Comprehensive crafts knowledge

Years of experience in crafts bring enormous knowledge. We want to share this knowledge with you. Immerse yourself in crafts challenges in one of our workshops, learn and discover new things, and take this motivation with you into your daily life!

Learn to expertly handle tools, materials and techniques in a stimulating environment. Our bright and perfectly equipped course workshops in an inspiring setting are a paradise for any craftsman.

Order our workshop scheduler **for free** -
telephone +49 (0)9931 4058-902 and online at
www.dictum.com/workshops

Participants receive a **10 % DISCOUNT** on any purchases* for the duration of a workshop

Discover our crafts courses:

Have you always wanted to bind a book, build a boat or restore an antique table yourself? Or would you prefer to work with metal? Cast bronze, forge silver or plate with gold? With over 200 workshops, there are no limits to developing your creativity and skills. And every workshop ends with a product you have made with your own hands. Explore your creative side!

Your teachers:

Our workshops are taught by experts from around the world. They pass on the expertise they have acquired over years of practice, but always take into account your personal level of knowledge. Whether you choose a beginners' or advanced course, every workshop provides sufficient time for personal instruction.

We reward loyal participants:

► 10 % discount

For the duration of the workshop and one week after, participants will receive a 10 % discount on any purchases* in our shops.

► Bonus card for workshops - Loyalty pays!

After participating in five workshops, you will receive a €50 DICTUM shopping voucher. For each further participation, the value of your voucher will increase by €10. You will receive the Bonus card automatically on registration.

► Combination bonus

You will receive a €20 DICTUM shopping voucher for booking a combination of basic and advanced courses or a series of courses.

► Apprentices

Upon verification, apprentices will receive a 10 % discount on workshop fees.

* Books, DVDs, power tools from Festool, Bosch Professional and Lamello, as well as already reduced items and all products from Mafell are excluded from this offer. For further information see www.dictum.com/non-discountable-items

DICTUM VOUCHER
