DICTUM® wood care service for cutting boards

We offer a professional care service to help you significantly extend the lifespan of your cutting board. We carefully remove traces of wear and cutting marks and recondition the surface with food-safe walnut oil. You can take advantage of this service until your board reaches a minimum thickness of 18 mm.

Please note:

This service is available exclusively for DICTUM Wavy Edge Boards (Nos. 708978 and 708979).

Our DICTUM wood care service for cutting boards includes the following steps:

- Planing your cutting board with a surface or thickness planer to remove deeper cutting marks.
- Sanding the surfaces and edges to achieve a smooth and even finish.
- Treating the surfaces with nourishing walnut oil to protect the wood and preserve its natural beauty.

Your cutting boards will be sent back to you just a few days after treatment. Alternatively, you can arrange a pick-up at one of our shops - simply note this on the order form. Along with your freshly restored cutting board, you will receive an invoice, which can be easily settled in person or by bank transfer.

WOOD CARE SERVICE	Price per item (incl. VAT, plus shipping costs)	Number	Note
Wood care service for cutting boards	4.00€		

For further information on our Hardness Test see www.dictum.com/service ▶ *Plus shipping charges (prices include VAT).*
